

Dodecaedro

200 AÑOS
BICENTENARIO
ARGENTINO

Argentina is celebrating its 200 years during 2010.

Dodecaedro was responsible for the **Design and General Coordination** of the main project called "**Bicentennial Walk**", on July 9th Avenue, one of the most important streets of Buenos Aires city. The project consisted of an urban intervention along 10 blocks, with the presence of structures built for each of the national states and different countries invited.

We believe that this celebration should be widely shared, especially by its magnitude and importance for the country. It is therefore our intention to bring this information to IFES, and all its members.
