

Company Profile

1971 – 2017 A story that spans over 45 years

Montecolino, a **leading company in the European arena for the production of flooring and textile coverings**, is named after the promontory of the same name on Lake Iseo where its story began in 1971. Due to the lack of available space to expand the business, the company was forced, in 1975, to move to the nearby town of Provaglio d'Iseo which is where building work started on the new premises.

Today, Montecolino occupies premises covering 54.000 m² in an area of 120.000 m² and has a production potential of more than 15 million m² with over 4,000 customers in 30 countries worldwide.

The astute use of the most modern productive technologies and research into the most advanced stylistic solutions has made Montecolino the ideal partner for anyone who designs, creates and distributes solutions for **interior and exterior** design in Italy and the world.

With a collection of **over 300 articles**, including carpets, rugs, synthetic grass, fabrics and coverings, Montecolino has always strived to provide services that met the expectations of

customers and as a result, the made-to-measure, hemming, rubber backing and custom printing departments have been set up and expanded over the years.

Mont**ECO**lino

Montecolino has always taken great care over the design of its products and over the last ten years has also committed to **reducing its environmental impact**, resulting in a considerable reduction in production waste and emissions, and the inauguration of two photovoltaic plants for over 300 KW, as well as the implementation of a process to reduce internal energy consumption by more than 20 % (expressed in toe: tonne of oil equivalent).

The winning strategy of Montecolino, which for over 45 years has grown and developed in maximum industrial and financial soundness, is linked to its fundamental choice to design, produce and sell in the constant pursuit of quality. **The highest quality in every phase of design and production**, a quality achieved through the careful selection of raw materials, the efficiency of the production machinery and constant in-house laboratory analysis of every phase of production.

An in-house research team has been hard at work for many years, supported by a successful partnership with the university world, producing important results both in the development of new products and in the development of new processes.

Strong points

Versatility in the offer. From a single supplier, a complete range of products, to make procurement management simple.

Flexibility in its response to its customers is guaranteed by ample stock in the warehouse and numerous production lines, the use of stand-alone machinery making it possible to interrupt processes to complete urgent, last minute orders and the ability to operate with a smaller output compared to rival companies.

Customisation of even one piece thanks to the made-to-measure service and the possibility of printing any type of design proposed by the client and/or created with the support of the internal graphics department.

Complete cycle: from the production of fibre to the processing of textiles and finishing based on customer requirements.

Products

Continuous investment in the research and development of innovative, on-trend solutions has allowed the company to create a wide range of custom products and to offer its customers the best solution whatever the situation, in the shortest possible time. Flooring, carpets, runners, textiles and synthetic grass which can satisfy a variety of customers and span all areas of use:

Installations: fairs, events and exhibitions

For staging fairs, major events and exhibitions. Montecolino offers a wide choice of flooring and decorative fabrics which are ideal for customising and creating a unique exhibition area.

Montecolino has heavy-duty, **needle punch carpets** for areas with high footfall and **woven carpets** for events and installations where “making a difference” is all-important.

The range includes Tris Spagna which is the lightest floor covering on the market, so it costs less to lay, transport and store, plus has the best results in terms of recycling.

PVC. With a strong visual impact thanks to the wide range of colours on offer, the PVC floor covers in the Montecolino range come in a **glossy or matte surface with a glitter effect and PVC Dance Floor** for television studios, fashion runways, stands and display windows, theatre and dance performances.

Synthetic grass. Park and **Dundee** with resistance against fire classification are ideal for setting up trade fair stands, exhibitions and events requiring a floor that transcends the boundaries of a building, by transporting you into a realistic garden.

Prints. Montecolino offers its customers a wide range of floor covers that can be customised depending on your budget and the quantity and graphics required. **Logoprint Plus** is the high definition printing system that allows you to customise needle punch carpets with photographs, drawings and company trademarks. This is Montecolino's flagship article, produced entirely in-house by the only production line of its kind in the world, designed and built by Montecolino technicians.

Decorative fabrics. The idea behind the range of decorative fabrics in the **Cocktail Collection** was to offer customers an even more complete service with the possibility of staging the perfect event with the right mix of ingredients ... just like a cocktail! The collection includes **14 articles** including **fabrics, nets** and **string curtains**, available in **cotton and polyester**.
